Charging the
fleet, straight
from the wall

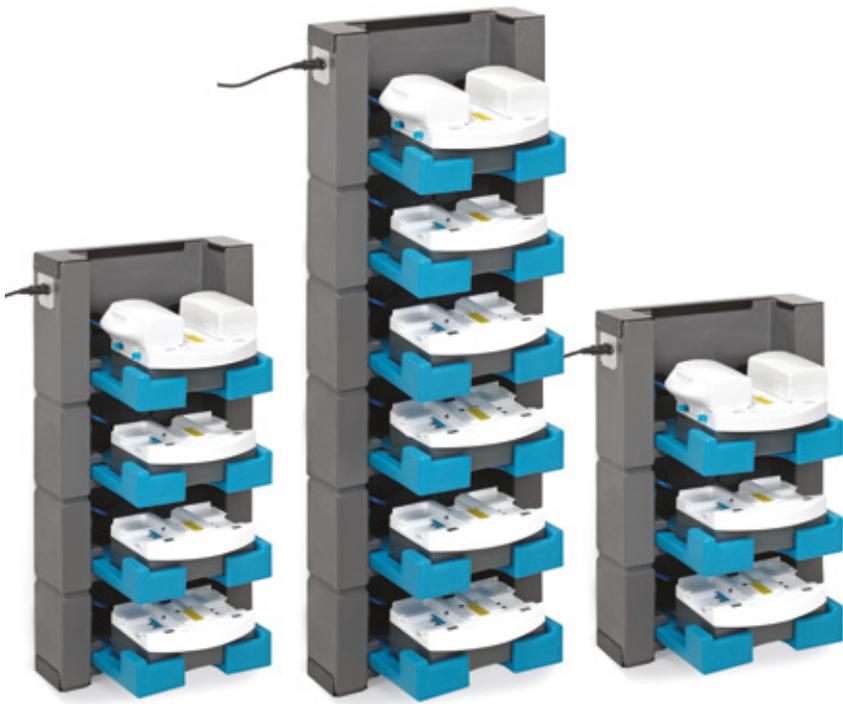

Power up

Space is in short supply these days. We should not waste a single inch when it comes to the limited storage space we can even get.

That's why we thought: why not use the vertical option towards the ceiling for charging your batteries? Now you can easily attach, hook-up, and power your batteries without losing space!

Key features

Multiple levels (3/4/6)

Choose how many levels of chargers you will need, and assemble them accordingly.

Fixed wall charger

The same as other multiple level wall chargers, but way more flexible and can be placed anywhere with a footed fixture!

Battery managed system

Battery management system that never overpowers itself for maximum lifespan. The system contains an integrated charge percentage indicator.

Technical specifications

3 layers

Weight of product	8.5 kg
Size l x w x h	49 x 34 x 74 cm

4 layers

Weight of product	10.5 kg
Size l x w x h	49 x 34 x 95 cm

6 layers

Weight of product	15.8 kg
Size l x w x h	49 x 34 x 137 cm
Material	LDPE 735
Warranty	1 year

V1.02-20180904
